Advice and tips	<ul style="list-style-type: none">- Try to experience many different opportunities whilst in school so you can try to figure out what you have a passion for and what career would suit you.-
What do you enjoy most about your career path?	Every day is different, whether that be in the stage of design or the building type itself, such as an airport, train station, school, concert hall, stadiums or skyscraper. Also, seeing a building that you've designed is very rewarding, and a little scary.
Anything else you would like to share:	The more proactive you are in seeking opportunities and bettering yourself, the more likely you are to be in a career that you enjoy and will be successful in.
